

## Preliminary information for your appointment with Klüber Lubrication at the Munich site

For an efficient and safe delivery or execution of planned tasks, we would like to provide you with some essential information before your visit.

### Entrance for technicians and suppliers

#### Address

Klüber Lubrication München GmbH & Co. KG  
Geisenhausenerstraße 7  
81379 Munich

#### Arrival

Please check in at the gate reception (metal platform in the courtyard driveway). You will receive your visitor/supplier ID badge and will be picked up by your client or a designated employee. They will take care of you throughout your stay on the premises.

Please wear your ID badge visibly throughout your stay. If you are coming back for several days in a row, you can continue to use the badge to enter the premises and contact the client/host directly. Please return your badge to the reception desk at your final departure.

At the reception, you will also be instructed in the applicable safety regulations. For certain deliveries of goods or services of larger scope, we designate an internal third-party coordinator. This coordinator will carry out a safety briefing at the first visit and inform you of all necessary measures.

## Safety regulations

Please note that you are visiting a production site. Environmental and occupational safety is our stated goal. We ask you, also for your own safety, to comply with the regulations.

The Road Traffic Regulations (StVO) apply throughout the company premises.  
The maximum speed is 10 km/h.

A general video and photography ban applies.  
A general smoking ban applies.

Smoking is only permitted at designated locations.

Caution! Industrial trucks are traveling on the inner courtyard. Please keep sufficient distance.

Wearing personal protective equipment (safety shoes, goggles and bump cap) is required in designated areas. If available, please bring your own protective equipment or contact your host.

In case of danger, please follow the instructions of employees at the site. Use the designated escape routes and, in the event of an evacuation, proceed with your host to the assembly point.

112 - Emergency number for fire department and ambulance

+49 89 7876-0 (internal 1111) - Reception phone number
