

# High-performance speciality lubricants for maritime applications

High profitability, increased reliability of components, improved workplace safety, long-term environmental protection....

## We are the New Ones - with decades of experience

Klüber Lubrication is the global market leader in speciality lubricants and tribological high-end solutions. As a reliable partner of our customers we enjoy an excellent reputation. Multinational groups as well as small- and medium-sized companies from a wide variety of industries have been relying on our competence, know-how and over 85 years of experience for decades.

We are increasingly successful in developing products suited to comply with the requirements of the marine industry. Klüber Lubrication already now has the most comprehensive range of lubricants for this industry, meeting the highest environmental requirements, e.g. EAL\*, Ecolabel, OSPAR.

## Your company success - our contribution

Efficiency, sustainability, competitiveness and profitability are essential criteria in due diligence. Our products and services contribute to the success of your company.

## We will be pleased to advise you - your long-term partner

In a personal exchange with you, we would like to identify the technical advantages of our products and their economic benefits.

## We are close to you - wherever you are

Lubricants made by Klüber Lubrication are available in the same high quality worldwide. Due to our global standing, one of our experts is always close to you.

## We offer solutions - and do not just sell products

We support you in selecting the right lubricants while taking into account numerous criteria - so that you meet your objectives. We perform lubricant analyses in our own laboratories aimed at achieving the best change intervals.

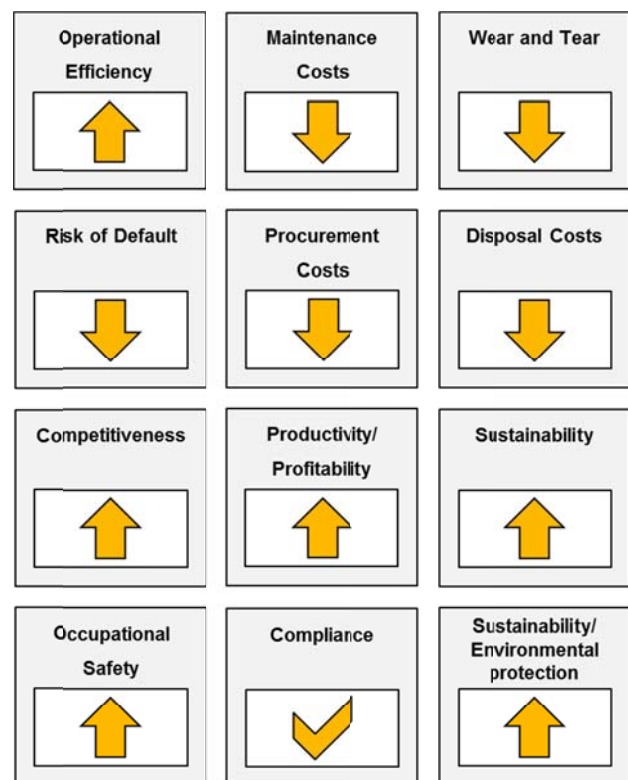

## Our speciality lubricants - more than just products

Our wide portfolio of synthetic lubricants are a real alternative to conventional mineral oils. We are continuously working on new developments and setting new standards in order to be able to meet the increasing requirements for lubricants.

## Our motto - innovation and quality

In our unique testing section we simulate the extremely high loads lubricants are exposed to in maritime applications. We load components beyond their stress limits. Based on our test results and findings we develop powerful, innovative lubricants which are in line with the legal framework.

## Klüber Lubrication offers more than just lubricants:

# High-performance speciality lubricants for maritime applications

High profitability, increased reliability of components, improved workplace safety, long-term environmental protection....
