

Get extreme food-grade protection with Klüberfood NH1 CH 6-120 SUPREME

The solid white lubricant formulation of Klüberfood NH1 CH 6-120 SUPREME is NSF H1 registered, providing a food-grade solution for chain lubrication at extreme temperatures without the residue of typical lubricants.

Advance on the path to food safety

- Registered with NSF as food-grade H1
- ISO 21469 certification meets hygiene requirements

Reduce costs of relubrication & maintenance

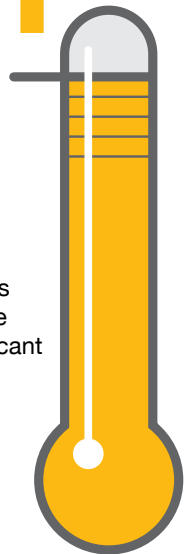

- Example: 1- to 2-week lubrication intervals in established practice
- Cleaner burn-off, reducing residue which can impede proper relubrication
- Extended chain life
- Carefully selected base stock

1200°F

Benefit from advanced food-grade formulation

- Single solution provides high-temp performance with a food-grade lubricant
- Solid white formulation has 1200°F (650°C) operational limit

State-of-the-art solution

- Supports automatic lubrication systems
- Backed by a world leader in specialty lubricants

Usage tips

- Mix prior to application — if using automated lubrication system, employ an agitator in the reservoir, as with any solid lubricant in fluid suspension
- Apply at chain temperatures below 300°F (150°C) to allow penetration of solid lubricant
